Bike Michiana riders will raise money in 2024 for MCC's project, "Water for the Future in Bolivia." For families in the area of Potosí, Bolivia, water shortages are a very real threat. MCC is working to pipe spring water from the mountains for household use and irrigation. Gifts to MCC will also support local conservation efforts like tree planting. Investing in this community helps to protect water sources and land, while reducing the need for people to migrate. Protecting areas at high altitude above natural springs also helps to ensure that communities have sufficient water.
